The Re-Match HI-Park Facility

Herning, Denmark

Re Match
TURF RECYCLING

Re Match
TURF RECYCLING

The Vision

- 🔄 To create a circular solution for the turf industry which is:
 - Better
 - Cheaper
 - Simpler, and
 - Available
- 🔄 To assume 'category leadership' within circular economy for synthetic sports surfaces and provide true recycling to pitch owners

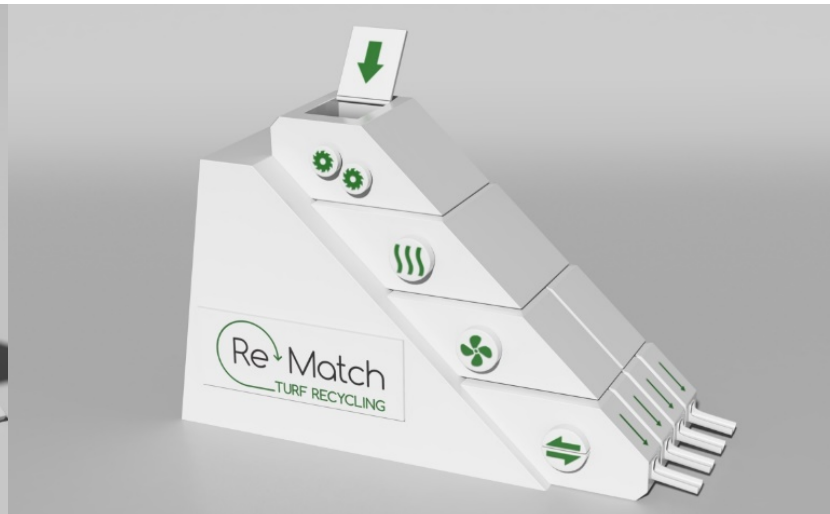

The Process

Turf input

Down-sizing · Drying · Separation

Sand · Rubber · Backing · Grass Fibre

Certification

🔄 EU ETV (Environmental Tech. Verification)

- Re-Match process verified using ISO 17020
- Verification of environmental performance

🔄 EU GVP (General Verification Procedure)

- Verified using ISO 17020, and
- Implementing ISO 14034

End Products

Sand

SBR infill

Backing

Fibre

Production is running smoothly

- with 140 fields recycled in 2018
