

True Recycling

An introduction to
Re-Match

The Company

- 🕒 Idea formed in 2012, established 2013, patented technology in 56 countries
- 🕒 First facility in Hi-Park Herning, Denmark; 30.000 m²
- 🕒 Capacity: 200 full size pitches/year
- 🕒 Staff of 30 people
- 🕒 Expansion has started – factories coming in the Netherlands, France – and more are being planned.

The Re-Match HI-Park Facility

Herning, Denmark

Re-Match
TURF RECYCLING

Re-Match
TURF RECYCLING

The Vision

- 🔄 To create a circular solution for the turf industry which is:
 - Better
 - Cheaper
 - Simpler, and
 - Available
- 🔄 To assume 'category leadership' within circular economy for synthetic sports surfaces and provide true recycling to pitch owners

The Process

Turf input

Down-sizing · Drying · Separation

Sand · Rubber · Backing · Grass Fibre

Certification

- 🔄 EU ETV (Environmental Tech. Verification)
 - Verification of environmental performance

- 🔄 EU GVP (General Verification Procedure)
 - Verified using ISO 17020, and
 - Implementing ISO 14034

- 🔄 ISO 9001
 - Consistent product and service delivery

End Products

Sand

SBR infill

Backing

Fibre

Production is running smoothly

- with 152 fields recycled in 2020

A circular inset image showing several rolls of turf (grass sods) stacked in a container. The turf is covered with a grey mesh netting. The rolls are arranged in a row, and the background shows more rolls and some structural elements of the facility.
